

10 Steps to Hooping Great Towels

1. Hoop stabilizer (I use wash away).

2. Spray adhesive on stabilizer to hold towel in place.

3. Position the towel where you would like your design to go.
(For this towel I wanted it in the lower left corner)

4. Lay down netting/tulle
(Use a color that closely matches your towel)

5. Secure netting/tulle
Make sure any pins are kept out of your stitch field

6. Test the area before starting to embroider, just to be sure your pins are out of the way

7. Remove pins as necessary and hold with fingers...
be sure your fingers are well out of the way.

8. Trim netting close to design.

9. Trim stabilizer

10. Your finished. :)
(Click finished towel for larger image)

Design used for this tutorial were purchased from [Embroidery Library](#)
