

## Create your own Windssock by Candy

### Supplies for Windssock

- 1- 5inch wooden hoop (the ones used for embroidery)
- Drill 3 small holes equal distance apart in hoop. (About 5 1/2inches apart)
- 1- large fishing swivel
- Kite string for hanging
- Nylon flag fabric

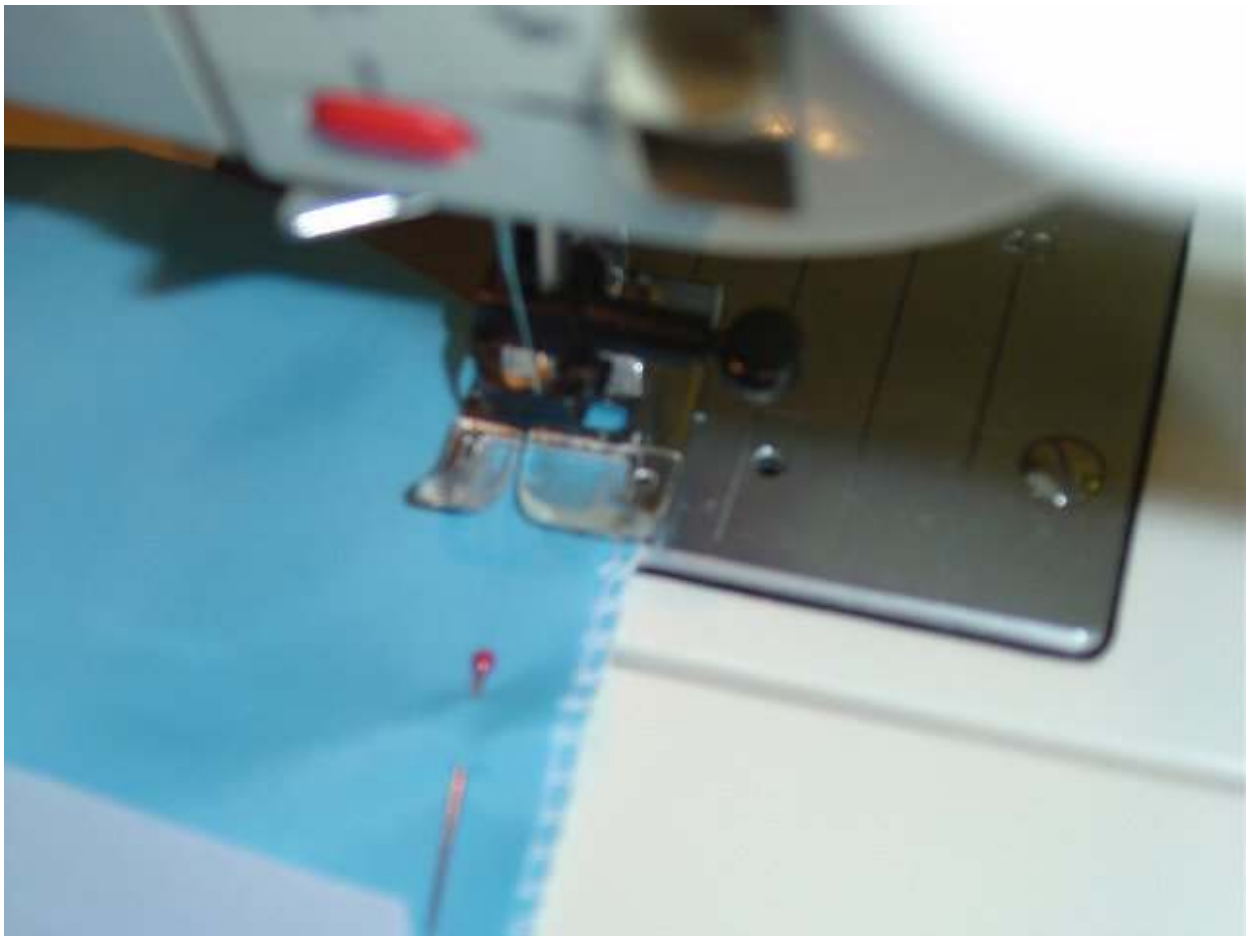

I. Cut one piece of Flag fabric 17inches wide by 18 inches long

II. Cut 6 streamers 3 inches by 40inches (if your fabric frays, use seam sealant on raw edges). I used an old flag streamer for a pattern but you can draw one freehand by making a snake like design within the 3 inch pattern).

III. Embellish your 17X 18 inch piece of fabric with theme of choice

IV. Sew the streamers on bottom of the 16 x 18 , right sides together at bottom of fabric

V. Wrap the fabric around your hoop to make sure you have enough fabric to fit around the hoop. Mark then with right sides together sew long seam. (finish off any raw edges to prevent fraying in the wind)

VI. Press open seams and now put the hoop in top end of windsock making a casing about 1 inch.

VII. With a zipper foot , sew the hoop into the casing.

VIII. Cut three double pieces of kite string 12 inches long. With a wide eyed needle, thread a string through each of the holes in the hoop. Tie all three off at top. Now thread through the small end of the swivel.

IX. Hang Proudly!!!!!!
